

SIMPLE WAYS TO SAVE FUEL

1. Always use recommended tire pressure levels, for your type of vehicle.
2. Periodic maintenance of your motor, oil filters and liquids will keep your motor running efficiently.
3. When driving on highways, keep your windows closed. This will reduce fuel consumption by keep your vehicle aerodynamic.
4. Use your air-conditioning responsibly.
5. Do not overload the optimal carrying capacity of your vehicle.
6. Drive responsibly, do not over accelerate or rev your engine.
7. Organize with friends and neighbors, carpool and share fuel expenses.
8. Use public or alternative transport for short trips or in the city.
9. Research and choose the shortest and most direct routes to your destination, making the least possible stops.
10. If you need to wait for more than one minute, it is recommendable to turn your engine off.
11. Always try to park in the shade to minimize the evaporation of fuel, liquids and the overheating of your vehicle.
12. When you go to buy a new vehicle, choose one with low fuel consumption characteristics.
